

Dan Holmes for Sustainability Officer

Hello there!

I'm Dan Holmes, I'm currently studying Renewable and Sustainable Engineering at Foundation Level. Originally I'm from Derby but currently reside in Oxtun. I'm an avid gamer, love to cycle and go indoor climbing!

I plan to run for the Sustainability Officer as it coincides well with my area of study and recently the university has placed climate change as a state of emergency and I believe as a university we can slow the rate of climate change by doing our bit.

- I aim to reduce the university's impact on the environment by working with the relevant staff to closely monitor and hopefully reduce the use of electricity and heating around the campus.
- Recycling is a huge factor in reducing our waste and I plan to teach all students and staff to properly recycle.
- Aim to reduce our carbon footprint by improvements in transportation around the university.
- Investigating the feasibility of alternative forms of renewable energy.

If I'm elected I will try my best to make long lasting changes as I'm extremely passionate about making an impact in reducing the university's carbon footprint as well as being the university's face of sustainability.

Together we can do this!
