

Kelly Jones

As a postgraduate student, Faculty Representative, TrACE Champion, and a student Representative. I am passionate about ensuring postgraduates' voices are heard and valued at Wrexham University. I believe communication is key, and my experiences have shown me the importance of transparency, fairness, and collaboration in building a stronger student community.

Alongside my studies, I work in an agency supporting learners with Additional Learning Needs (ALN). This has deepened my understanding of the importance of accessible support networks for learners, parents, and carers. While my professional background focuses on supporting younger learners, my passion extends to supporting students of all ages. By listening, communicating, and acting on feedback, I aim to strengthen the support available for postgraduate students across the university.

If elected, my priorities would be:

- Improving Communication: Ensuring all students, including postgraduate voices, are listened to and concerns are acted upon at the right level.
- Inclusivity: Using the TrACE lens and my ALN experience to champion fairness and support for all students.
- Enhancing Support: Strengthening academic, research, and well-being opportunities for postgraduates.
- Building Community: Bringing postgraduates together, whether you're learning on campus, online, or beyond, ensuring that all students feel part of university life.

My motivation is to create a supportive and inclusive environment where every postgraduate can thrive both academically and socially. I will be approachable, proactive, and committed to delivering positive change for our postgraduate community
