

Nyarko Sakyi

As an MBA student at Wrexham University (through a partner institution), I am passionate about ensuring that students studying across partner campuses have their voices heard, valued, and acted upon. I am standing for the role of Partner Institutions Officer to strengthen the link between our community, the Students' Union, and the wider university.

With over a decade of professional and leadership experience, I have held roles in education, consultancy, and management that required strong communication, problem-solving, and teamwork skills. I currently serve as a course representative, where I have been privileged to listen to my peers, raise their concerns, and collaborate with faculty for solutions. This has deepened my belief that meaningful change starts with effective representation.

If elected, I will prioritise three key areas:

Advocacy & Representation: Ensuring that the needs of partner institution students are presented clearly and consistently to the SU and university leadership.

Improved Communication: Creating reliable channels for students to share feedback and receive timely updates on SU initiatives.

Inclusive Student Support champions initiatives that enhance well-being, academic engagement, and community spirit, especially for international and part-time students.

The MBA programme is equipping me with advanced leadership and strategic skills, which I intend to use in this role to foster stronger connections and deliver positive results.

With your support, I will be a dedicated voice for all students of our partner institutions.
