

Samantha Evans

Hi,

I would love to become your Mature Student/Parent/Carer officer because I am all of these things myself, and I know what it is like to feel lost at times and to need support/help whilst parenting children, caring for a loved one, and doing all that is necessary to achieve a Degree. I am a mother of three (one of my children has a disability), and a carer to my mother who is sadly under palliative care. I cared for my Father-in-law of 25-years during his battle with Cancer during my BA Degree (Graduated May-2025).

I would love the chance to give those who need it, the support that I so desperately needed, to help people gain the resources, support and help that I utilised - (Wrexham University has a lot of resources and help on hand for you). I think I just about used them ALL when I was hit with so many devastating events during my BA Degree. I want to create a space and a point of contact where I can help others just like me. Those who have so many more demands on them than their studies - should never feel alone. A safe space where we can come together, talk, be listened to, and be helped to use all the helpful facilities, aids and resources that our university has to offer. If anyone feels something is missing which would aid in their experience, I will happily bring that to SU meetings.

Warmest

Samantha Evans
