

Vicky Nevitt

Hi there,

I'm Vicky (Student Nurse), I'm putting myself forward for the St Asaph Officer role because I really care about making our campus a place where every student feels supported, connected, and heard. St Asaph has such a great sense of community, and I want to build on that by creating more opportunities for us to get involved, share ideas, and make the most of our time at Wrexham University.

Before coming to university, I worked as a manager/lecturer, which taught me how to listen to people, lead a team, and find solutions that work for everyone. I'd love to bring those skills into this role by assisting in organisation of events, raise any issues that matter to students, and make sure our voices are represented across the wider community that is Wrexham University.

I'm motivated by the idea of bringing people together — whether that's through social activities, better communication, or making sure everyone knows the support available to them. I want to make St Asaph a place where every student feels part of something bigger and proud to call it their campus.
